

Tech Tips for Presentations

Know your Ports

HDMI

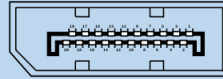

(Most common)

VGA

DVI

Display port

Mini Display port

Check your laptop to know what ports you have. Your best bet for compatibility is to make sure your laptop has either HDMI or VGA. If not, buy an adapter

Start Projecting

+ P

On your keyboard to start projecting

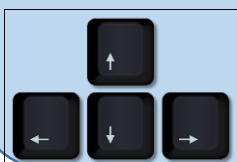

If the projector doesn't automatically project your computer, look for a **source** or **input** button

Source

Presenting

Change slides using arrow keys or mouse wheel

or

Zoom in and out using:

+
